Eyes	Can cause moderate irritation. Immediately flush the eyes with plenty of water for at least 15 minutes. Call a physician.
Ingestion	May be harmful if ingested.
Inhalation	High gas vapor or mist concentrations may be harmful if inhaled.
Important symptoms and effects, both acute and delayed	Acute: May be harmful if ingested in sufficient quantities. Non-irritating to intact skin; keep away from mucous membranes and abraded skin. Contact with eyes causes irritation. High gas, vapor, or mist concentrations may be harmful if inhaled. This product does not present an immediate concern for emergency personnel. Delayed Effects: None known.

SECTION 5: FIRE-FIGHTING MEASURES

Extinguishing media	Foam, Dry chemical, Water spray, carbon dioxide.
Hazardous products of combustion	As with other organic materials, combustion will produce carbon monoxide and carbon dioxide.
Special firefighting procedures	Wear self contained breathing apparatus and protective clothing. Normal firefighting procedures may be used.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Steps to be taken in case material is released or spilled	Isolate the hazard area and deny entry to unnecessary and unprotected personnel. Remove all contaminated clothing to prevent further absorption. Decontaminated affected personnel using the first aid procedures in Section 4. Leather shoes that have been saturated must be discarded.
Environmental precautions	Prevent releases to soils, drains, sewers, and waterways.
Containment and clean up	Contain spilled liquid with sand or vermiculite and place in chemical waste container. Prevent runoff from entering drains, sewers, and streams.

SECTION 7: HANDLING AND STORAGE

Safe handling	Wear appropriated protective equipment when performing maintenance on contaminated equipment. Wash hands thoroughly before eating or smoking after handling this material. Avoid contact with eyes, skin, and clothing. Use with adequate ventilation. Wash thoroughly after handling.
Safe storage	This product should be stored at ambient temperature in a dry, well-ventilated location. Keep container closed when not in use. Incompatible with oxidizing materials.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Limits	Osha PEL: 1000 ppm TWA: 1900 mg/m3 TWA	ACGIH TLV: 1000 ppm STEL
Personal protective equipment	Goggles or glasses with side shields. Clothing should be sufficient to minimize physical contact. The use of a NIOSH-approved organic vapor respirator is recommended whenever this product is used in a confined space or heated above ambient temperature.	

Respiratory protection	Observe OSHA regulations for respirator use (29 CFR 1910.134). Air-purifying respirators must not be used in oxygen-deficient atmospheres.
Ventilation	All operations should be conducted in well-ventilated conditions. Local exhaust ventilation should be provided.
